

Armis Biopharma Donates ArmisClenz™ Disinfectant to Convoy of Hope for Hurricane Ida victims

September 23, 2021 (Ft. Collins, CO) – Armis Biopharma Inc., makers of ArmisClenz™, a new EPA registered surface disinfectant, today announced a product donation to Convoy of Hope for Hurricane Ida victims.

“It’s been over 3 weeks since Hurricane Ida made landfall off the coast of Southeast Louisiana and many storm victims have now started the daunting task of cleaning and rebuilding after the storm,” said Ted Ziemann, Armis Chairman and CEO. “Potential exposure to harmful bacteria, viruses and fungi is much greater in areas that have experienced standing water, excessive heat and other storm damage. ArmisClenz™ Spray Disinfectant helps reduce that exposure. “

The ArmisClenz™ donation made by Armis Biopharma provides a safe and effective way for storm victims to kill pathogens that dwell on surfaces in homes, offices, hospitals, nursing homes, schools and food production facilities. It is also safe to use as a fruit/vegetable wash and it is safe for the environment, ground water and aquatic life.

” We hope this donation provides a small sense of relief to victims and would like to thank the Convoy of Hope team for their tireless efforts to provide food, supplies and humanitarian services to Hurricane Ida victims as well as impoverished and needy populations throughout the world,” said Ziemann.

About Armis Biopharma

Armis Biopharma, with headquarters in Fort Collins, Colorado, is a privately held biopharmaceutical company that is devoted to developing and commercializing products that are effective in reducing the risk of infectious disease and antimicrobial resistant infections. Product development is focused on surface disinfection, human and animal wound care, oral care, food safety and decontamination of chemical and biological warfare agents.
