

VERICYN®

WOUND WASH

VeriCyn® is a FDA cleared and extensively studied wound wash formulated for post-surgical wound care, wound lavage, and surgical wound wash outs.

Key benefits:

- **Removes Bioburden** – debris, necrotic tissue, fibrotic tissue
- **Maintains Antimicrobial-like Properties** – testing shows effectiveness, against pseudomonas, MRSA, and other bacteria, virus, and fungi
- **Stimulates Healing** – increased tissue granulation, increased fibroblast proliferation, greater microvascular endothelial cells

A No Compromise Solution

Evidence-based:

- GLP Safety & Efficacy Study
- 2 Pre-Clinical Studies
- Clinical Evaluation Feedback

Ideal for Use in:

- Ambulatory Surgery Centers (ASC)
- Wound Care Centers
- Hospitals

VERICYN®

WOUND WASH

VeriCyn® Wound Wash

Technology is a first of its kind combination of hydrogen peroxide, peracetic acid, and proprietary ingredients that prevent wounds from becoming infected, as well as heal chronic/non-healing wounds.

Fully-vetted through:

- Independent, 3rd Party Laboratories
- 27 Biological Efficacy Studies
- 19 Safety Studies

VeriCyn® Wound Wash Achieves:

- > 5 Log Kills across wide range of pathogens (including resistant strains)
- 64% greater granulation*
- 40% greater human fibroblasts proliferation*
- 425% greater microvascular endothelial cells*

Product Economics:

- Potential to reduce cost of non-healing wounds
- Potential to reduce wound infection
- Potential to reduce surgical site infection

*Independent Testing of Foundational Formula **Future Indication

Developed for surgical, chronic and acute wound care (prevention & therapeutic), **VeriCyn®** is available in “spikeable” hanging bottles, spray bottles, and squeeze bottles in sterile** and non-sterile Versions.

Non-Toxic:

No Toxic Residue

Non-Irritant:

Will NOT Retard Tissue Healing

Inexpensive:

No Special Handling or Storage
